£9.3m

Project

New Build 3FE Primary School

OVERVIEW

Pellings were appointed under their Framework Agreement, for the delivery of this high profile school replacement.

Pellings proposal is an innovative solution for the redevelopment of an existing school within a tight urban location and a steeply sloping site.

Key health and safety challenges have been identified and include:

- Robust traffic management strategies need to be in place from the outset to ensure that local residents are not put at risk.
- The school will remain in occupation throughout the works and solutions for ensuring minimal disruption to pupils will need to be implemented.
- Effective controls to be put in place to ensure noise, dust and debris from the demolition of the existing school has a little impact on pupils and local residents.
